### **Caroma Skandic Mixer Range**

A modern alternative to the trusted and notoriously reliable Nordic range, Skandic single lever mixers provide a myriad of solutions for healthcare and commercial applications.

With a fresh, unassuming design the Skandic mixer range delivers a beautifully efficient and reliably robust choice for the most demanding and heavy duty applications.

Engineered for optimum performance, Skandic has been designed to use water and energy as efficiently as possible.

### Features

#### European designed and manufactured

- o Constructed to the highest quality, Skandic is built to last and designed for superior functionality. The ceramic seals used in Skandic have been tested to 910,000 pin movements, which is equivalent to approximately 20 years use.

#### Eco Temp\*\* energy saving pre-set adjustable temperature settings

- o The temperature limiting device saves energy and prevents scalding. To reach the maximum water temperature you have to move the lever actively all the way to the left. When you release the lever, it automatically returns to the pre-set comfort temperature.

#### Econoflow water saving pre-set adjustable flow settings

- o The pre-set starting position provides a comfort flow, suitable for washing up or washing your hands. To open the full flow, you need to lift the lever to its highest position. When you release the lever, it automatically returns to the comfort flow position.

#### Flexible soft PEX hoses

- o For superior durability and ultimate flexibility. The anti-bacterial properties of these hoses will ensure no contamination.

#### Smooth handling and easy operation

- o Ergonomic extended lever handle options are simple and comfortable to use for those with limited hand dexterity, the elderly and young children.

#### 40mm Ceramic Disc Cartridge

- o Skandic's long life ceramic disc cartridge ensures low maintenance and drip free performance.

- o WELS 5 star rated Basin Mixers and 4 star rated Sink Mixers

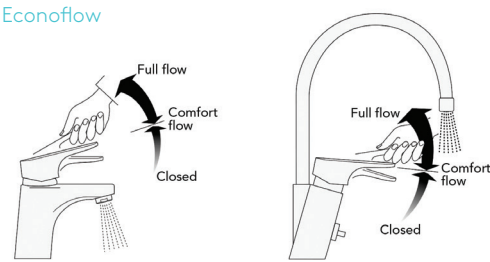

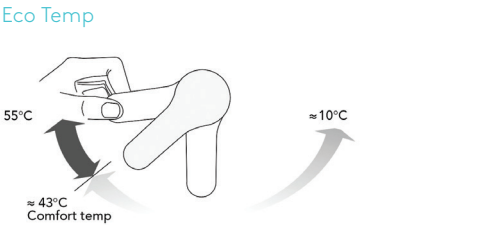

# The Skandic Bathroom Range
