

A modern office interior featuring a large window with a black frame. A person in a dark jacket and bright yellow pants is walking across the room. The floor is covered in a patterned carpet with various shades of grey and black. In the foreground, there are several red wire mesh chairs and a long wooden table. The ceiling has a modern lighting fixture with multiple glass shades.

Embodied Beauty Collection

**Less carbon in the atmosphere.
More beauty on your floor.**

The Embodied Beauty collection is designed to help restore the health of the planet and lower the carbon footprint of your space with style. The collection features a range of beautiful carpet tile designs, including our first-ever carbon negative products in three unique styles: Shishu Stitch, Tokyo Texture, and Zen Stitch. These pioneering products are created with a combination of our new CQuest™BioX backing, specialty yarns and tufting processes and are designed to create a carpet tile that stores more carbon than any before — helping you reduce the carbon footprint of your space by reducing the amount of carbon in the atmosphere.

The collection is inspired by the Japanese aesthetics of minimalism, restoration, and the organic beauty of the natural world. In addition to our three carbon negative products, you'll find calm, muted greys in warm and cool tones alongside natural colors for added dimension in Geisha Gather, Sashiko Stitch, Simple Sash and Vintage Kimono. From narrow monochromatic patterns to large scale graphic tufted textures, all of the styles in this collection combine and contrast tastefully.

The Embodied Beauty collection lives up to its name and shows that beautiful design and sustainability are inseparable. In addition to the three cradle-to-gate carbon negative styles. All of the styles that are featured within the collection are carbon neutral across their full product life cycle.
