BioCote® Antimicrobial Powder Coat Finish

BioCote infused powder coat kills 99.99% of harmful microbes within 2 hours, such as *E.Coli* and *MRSA*. The technology lasts the lifetime of the product and makes it easier to keep clean, dramatically reduces the risk of cross contamination and is a must have in any hygiene conscious environment.

White Satin*

EC™ Easy Coat Clear Finish

Price on application

Easy Coat Clear is an innovating product from Interpon Powder Coats. After applying the colour of your choice, the clear coat is baked on, creating a clear polyurethane coat. This makes cleanup of graffiti quick and efficient with standard cleaning materials without destroying the colour of the product. Used in train stations and public furniture, it is now available in lockers. Perfect for schools or shared access environments.

Clear (Goes Over Your Colour)*

MetaPrep™ Primer

Price on application

MetaPrep Primer adds an extra layer of protection to your investment to reduce the effects of corrosion which can occur over time. Limited to 1mm of corrosion creep per year from scratches that penetrate through to the actual metal; with minimal care, your Hi Tech Locker products will last for decades to come.

Precoat application. No colour.

RAL and Other Colours

Price on application

Although our range of colours is extensive, sometimes your project needs a specific colour. With our long relationships with the industry leading powder coat manufacturers, we can source any colour that is on the market.

**All listed price are ex GST and are per unit.*

** Surcharges may apply to noted colour.*
