

EasyTex™

The Modern Render Look Made Easy

The latest innovation to achieve a modern render look

A rendered exterior finish can add a touch of class to any project designed with a modern mixed-materials look in mind. But getting the render component right can be expensive and time consuming. That is, until now.

EasyTex™ panels are a new way to achieve a consistent, fine-textured finish, without the worry of high costs, aesthetic variability and wet trades. Made from James Hardie's durable fibre cement, EasyTex™ delivers a modern-render look with all the benefits of our external cladding range. With a simple v-groove joint design, EasyTex™ panels are easy to install, resistant to cracking and lime staining, and come ready to paint.

Features and benefits

- Pre-primed, embedded texture delivers a modern render look without the need for wet trades - simply fix and paint.
- Modern ship-lapped joint detail accommodates building movement and darker paint colours without the risk of cracking.
- The ideal cladding choice for non-combustible applications.
- Available in wider and taller panel sizes for minimal joints and maximum coverage.
- Slim wall footprint maximises internal living space compared to traditional render wall systems.

The EasyTex™ Range			
Length (mm)	Width (mm)	Thickness (mm)	Product Code
2,440	1,200	8.5	405123
3,000	1,200	8.5	405124
3,000	1,350	8.5	405121
3,600	1,200	8.5	405125
