

SPECIFICATIONS

Reimagine your office space with WorkWell. WorkWell Curtains are a flexible, modern and stylish way to instantly partition work and learning spaces to create quiet zones in otherwise noisy environments.

WorkWell Curtains can be drawn across office and learning spaces to simultaneously reduce noise and improve internal acoustics. The flexibility offered by WorkWell Curtains means spaces can be transformed, opening up new ways to work and learn.

Composition

Face Fabric varies
Acoustic Interlining 100%
Polyester carrier fabric coated
with a mass loaded vinyl (flexible
visco-elastic membrane and
patented constrained layer
membrane, combined with
vibration damping material)

Weight

Face Fabric varies
Acoustic Interlining 1500gsm
Total: ~2000gsm

Width

Face Fabric varies
Acoustic Interlining 1300mm

Fire rating

Face Fabric varies AS 1530.2 Acoustic Interlining AS 1530.2

Care instructions

Gently vacuum regularly with appropriate attachment. Remove hooks or pendants before cleaning. Wash below 30 degrees. Do not tumble dry. Iron at low temperature. Dry clean, any solvent except trichloroethylene, delicate. Bleach cleanable. (excluding Acoustic Interlining)

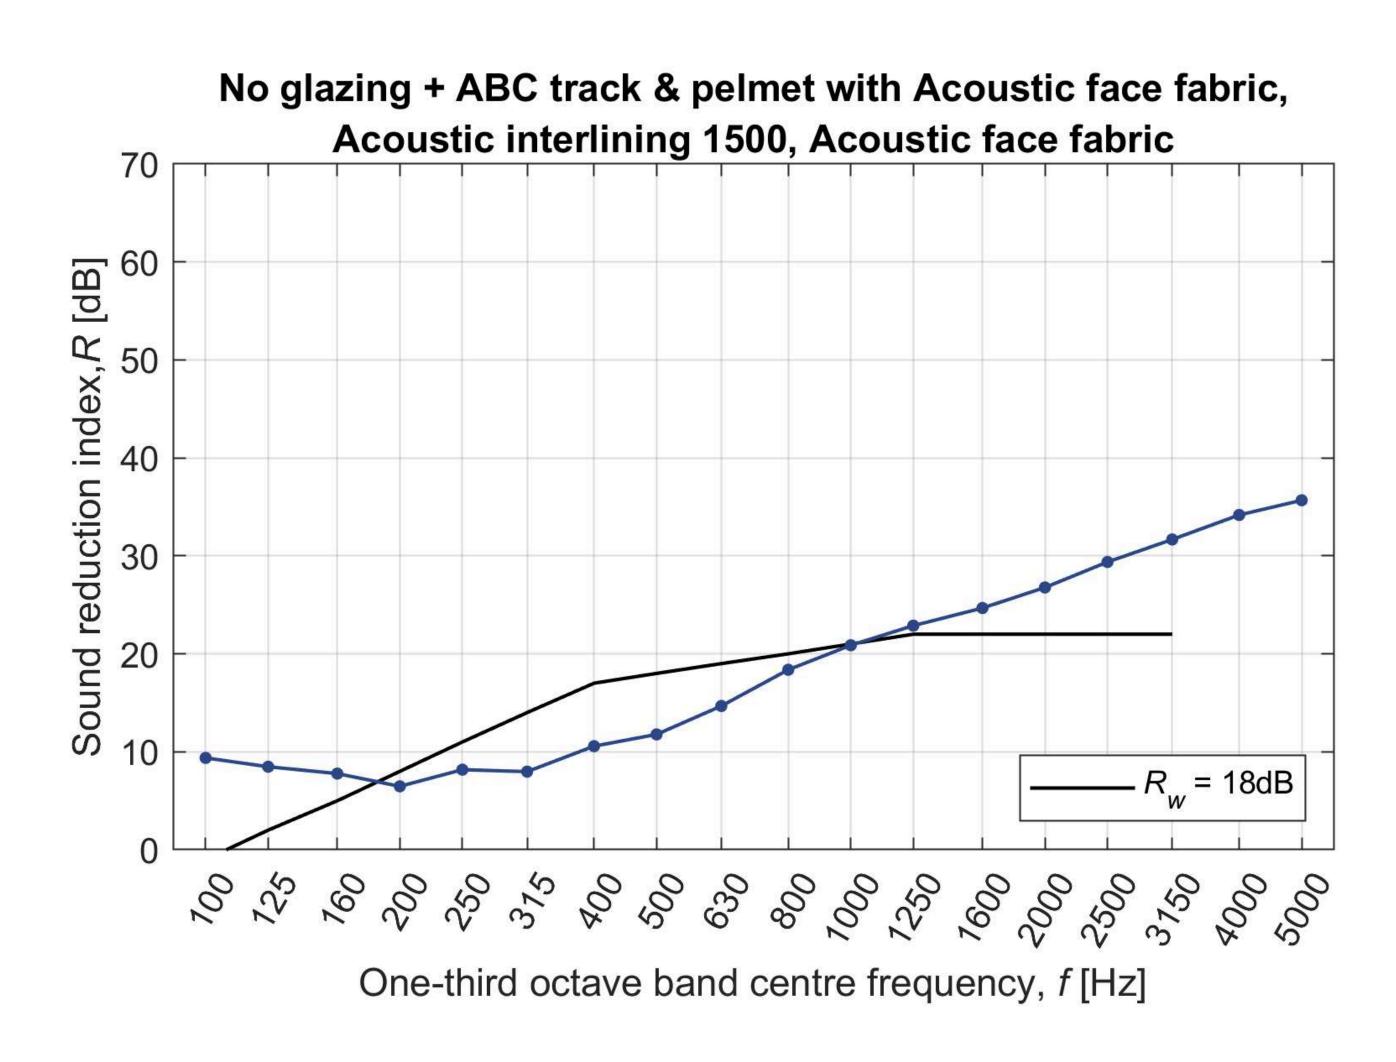

ACOUSTIC PERFORMANCE

We have conducted extensive testing at The University of Adelaide transmission loss suites for four glazing conditions - no glass, 4mm glass, 6.38mm glass and 10.38mm glass.

The weighted sound reduction index (Rw) is a single number rating of the noise insulation in decibels

The noise reduction coefficient (NRC) is the average sound absorption (from 0-1)
The weighted level difference (Dw) is a single number rating of the total noise reduction in decibels (noise insulation + sound absorption)

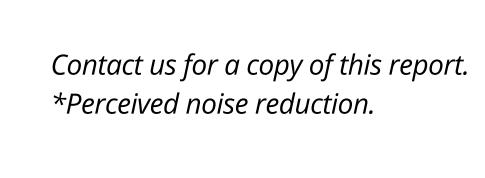

All measurements have been conducted in accordance with international standards (Sound reduction index, R, in accordance with ISO 10140-2 and Sound absorption coefficient, α , in accordance with ISO 354).

WorkWell Curtain

Weighted sound reduction index (Rw) = 18dB Noise reduction coefficient (NRC) = 0.55 Weighted level difference (Dw) = 19dB

Acoustic Blinds and Curtains reduce the noise by more than half.*

DESIGN YOUR WORKWELL CURTAIN

The WorkWell Curtain is a 3 layered curtain - with the Acoustic Interlining between two layers of your choice of designer Face Fabric, installed on our custom curtain track system. Note that all 3 layers are connected to the same track and joined at the sides so that they operate together as a single curtain.

Choose a Face Fabric from our Essentials and Select Ranges

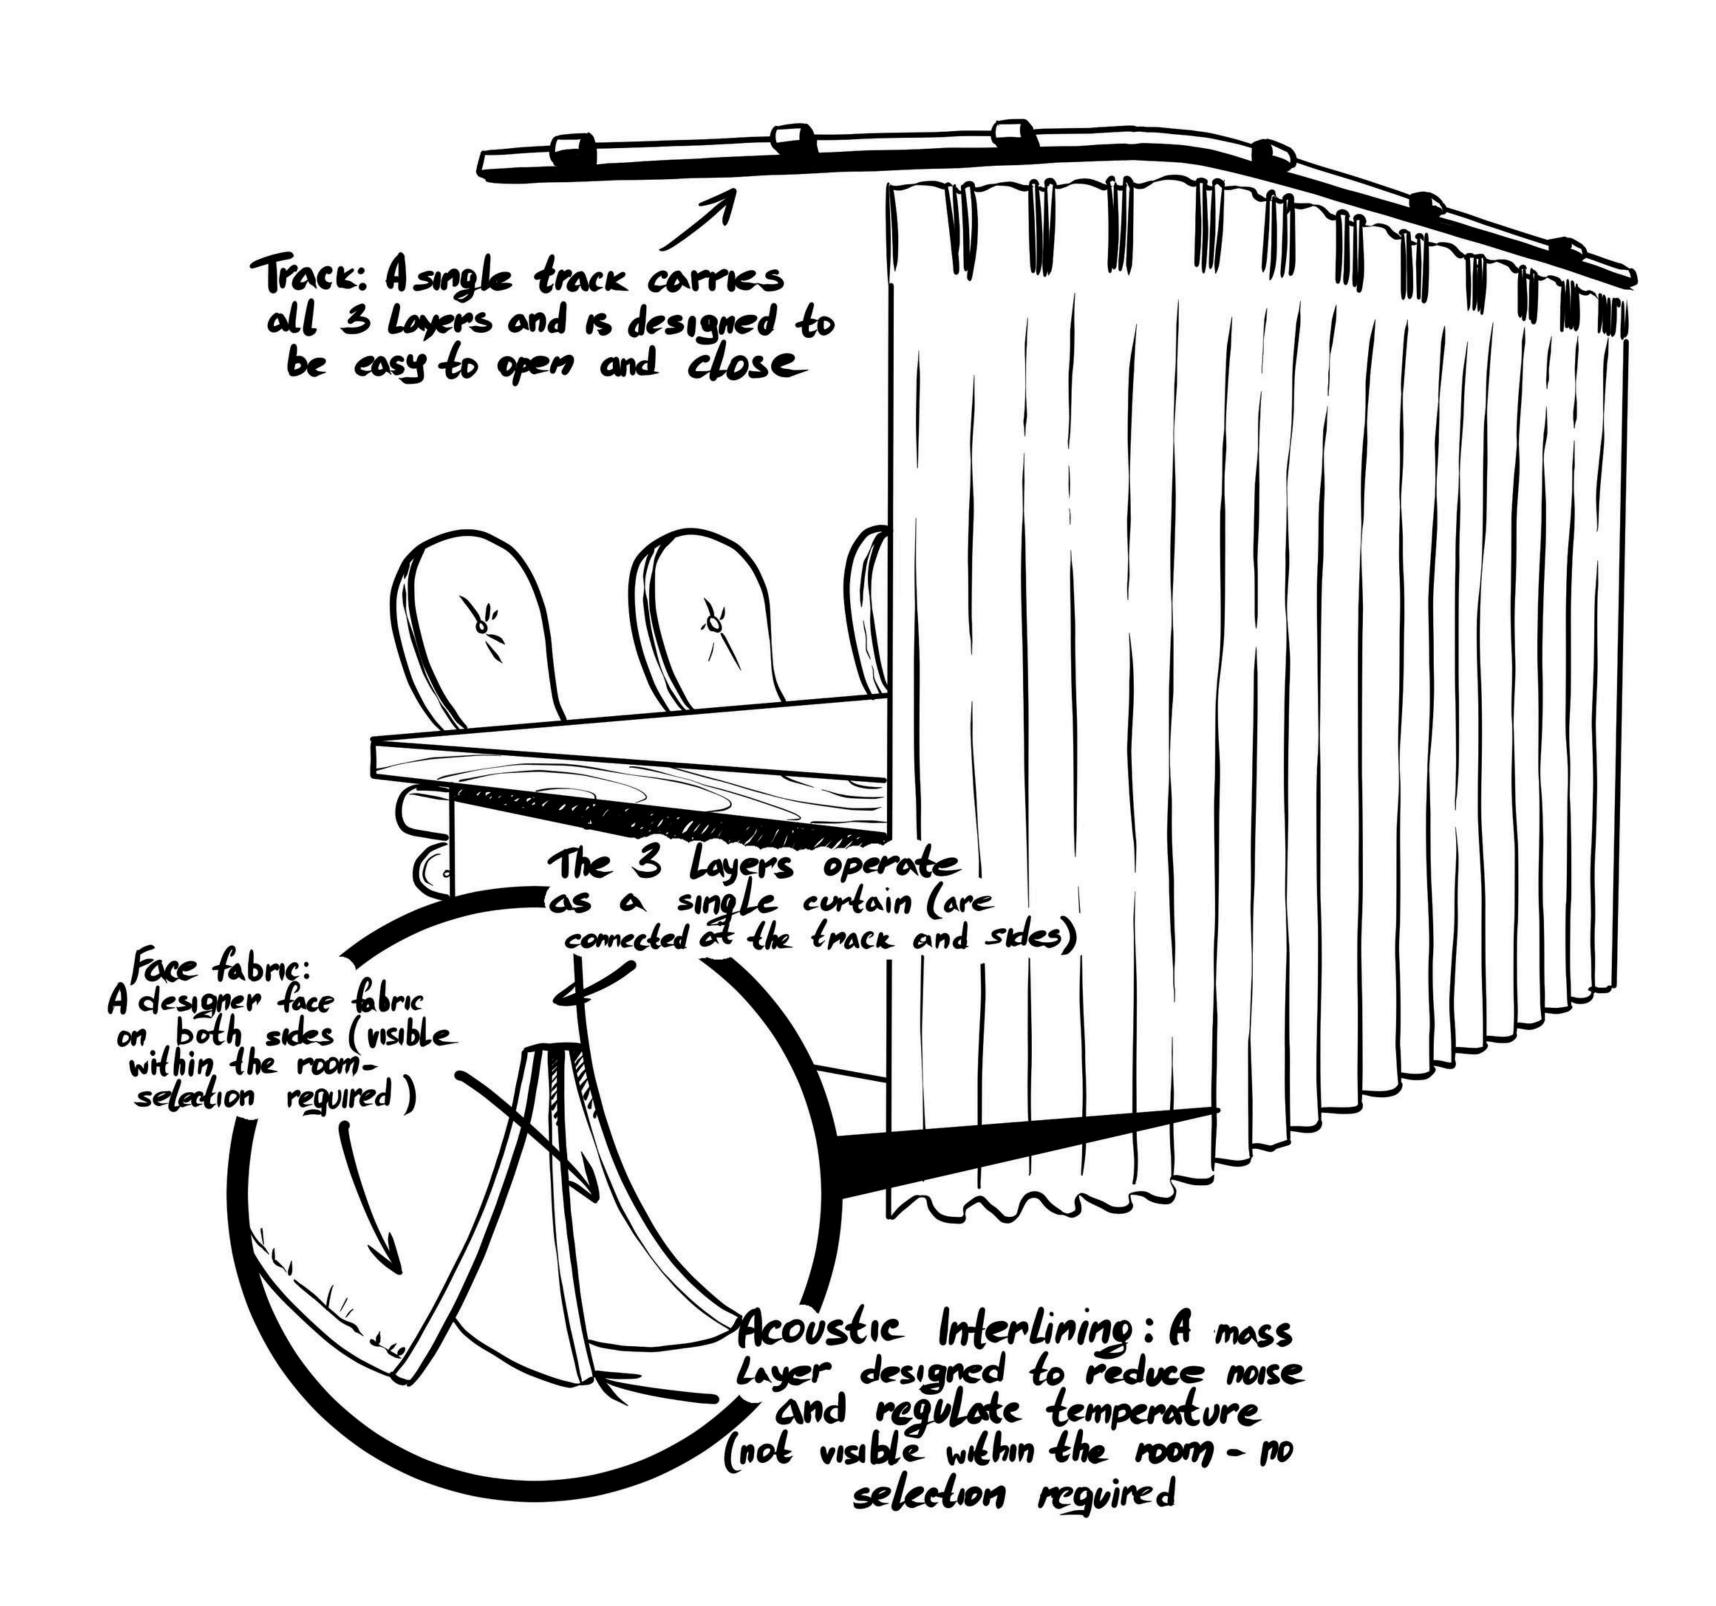

You only need to choose a Face Fabric - this is what you will see on both sides (the Acoustic Interlining is the same for all curtains and is not visible).

Essentials

The Essentials range offers simple, versatile, and affordable fabrics. Ideal for everyday use, these fabrics are perfect for most projects, providing great value without compromising quality.

Select

The Select range features a range of more premium fabrics. These fabrics are ideal for luxury designs.
