 **easycraft**®

easygroove 150 wall feature

easygroove 300 wall feature

NEW easygroove

EG150

EG300

This new product has been developed based on requests from home designers and architects across Australia. **easygroove** incorporates a slimmer V Groove profile in 2 optional spacings of 150mm and 300mm.

It presents an open and modern feel while still providing the tough surface finish of MDF and incorporating the hidden tongue and groove joining system.

easyvj

easyvj is our most popular wall and ceiling feature panel being used in both traditional and newly built homes. It will give living spaces a truly unique and contemporary feel. Can be used vertically, horizontally or diagonally as a feature wall, at dado rail height and even on ceilings.

easyregency

easyregency looks fantastic in the traditional home or as a feature in a contemporary home. This design will enhance any hallway, bedroom or dining room wall as a dado height or full length wall.

easyascot

The classic **easyascot** is perfect for that special room, adding an elegant touch. Combined with an easydado rail and easyline, the look is luxury all the way. Comes pre-primed with industrial grade undercoat for easy final coat application.

walls & ceilings made easy

easyvj wall feature

easyascot wall feature

easydado

easydado is designed to provide the perfect finish to 900mm dado wall height installations, whether using easyvj, easyregency or easyascot. Or they can be used as a decorative trim on full wall sheets. Available in flat or rebate profiles to suit your project.

easyline

easyline is the ideal alternative to plasterboard offering a smooth, tough, impact resistant surface. It is perfect for those high traffic family areas or media rooms where noise may be an issue. It can also be used in garages and storage areas for added strength and hanging support.

easyclad

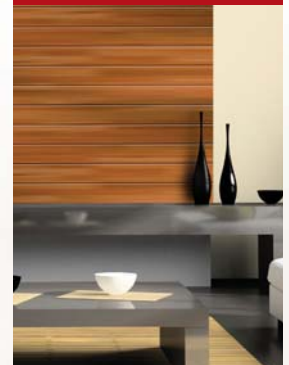

easyclad is recommended for use in high moisture areas (bathrooms) and semi-external (undercover) applications. It is made from 9.5mm reconstituted hardwood, has excellent environmental credentials and comes pre-primed on both sides with a commercial grade undercoat. It is available in smooth, VJ, regency or beaded profiles.

easyclear

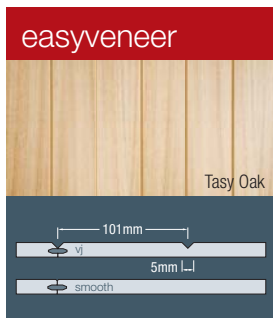

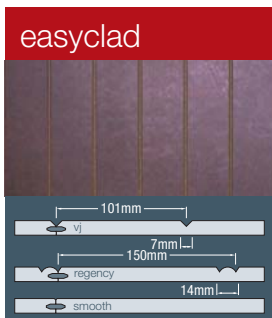

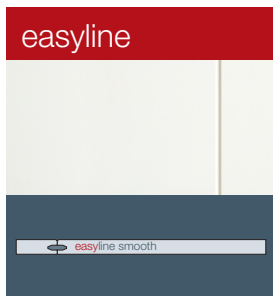

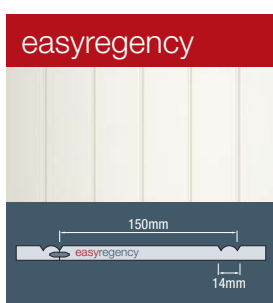

For a traditional timber finish **easyclear** is a hoop pine ply veneer ready to stain or clear lacquer. It's ideal for verandahs, ceilings and striking timber look walls, with the durability and warmth of timber and excellent environmental credentials. Available in smooth, VJ or beaded profiles.

easyveneer

easyveneer will save you time and money when wanting to create feature timber walls or ceilings. No knots or the inconsistent quality of timber boards. This is the latest in modern veneers and is available in either smooth or profiled finishes.

product	length (mm)	width (mm)	product code

	3000 (sm)	1200	TVS0930

Manufactured from a MDF MR base board with a Tasmanian oak veneer finish.

Note: Some product sizes are made to order. Please enquire when ordering. Length & width dimensions are nominal sizing only. E&O.E.

why choose easycraft

- **Easy to install** – either do it yourself or rest easy that just one tradesman can install your easycraft wall or ceiling feature from start to finish, utilising the easyjoin system, ensuring a strong, professional finish.
- **Easy on the eye** – in both contemporary & traditional design applications, easycraft looks superb, providing just enough profile to enhance any room.
- **Easy to finish** – easycraft MDF panels come fully pre-primed ready for the final coat application and you can use either water or oil based paint.
- **Australian owned and made** – using eco approved products sourced only from plantation timbers here in Australia.
- **Tough & impact resistant** – made from a (MR) moisture resistant (MDF) medium density fibre board, its ideal for those rooms that need to meet the day to day adventures of the whole family. Also great for garage and storage area walls, making hanging things easy.
- **New wall building or renovating applications** – easy to install over an existing wall or direct to frame for new building projects.
