

Carpets Inter® Sustainability Campaign

RECYCLING END OF LIFE CARPET ('TAKE BACK') / OFF-CUT WASTE INTO CEMENT PRODUCTION

The below info-graphic illustrates how since 2014 as part of Carpets Inter's cradle to grave mission, we have achieved Zero Waste going into landfill within Thailand. We currently recycle all manufacturing off-cut waste, collect and recycle all installation off-cut waste and prior to installing new product will uplift and take back our Clients existing 'end of life' floorcovering, irrespective of origin to be recycled as alternative fuel & resource by a leading Thai Cement manufacturer.

Our affiliation contributes towards building Thailand's municipal infrastructure, such as the new BTS mass transit railway, ensuring we indirectly contribute to clean transport by considerably reducing the number of private vehicles on Thailand's congested roads and subsequent CO₂ emissions polluting our environment.

Zero Waste to Landfill since 2014
