

Shutterflex

Setting the standard in shutters, louvres and screens.

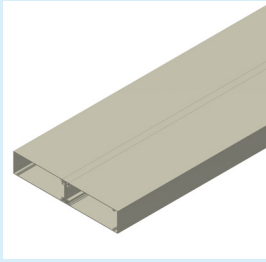

Trinidad

This new external aluminium shading system from Shutterflex is designed to create a sleek aesthetic while reducing solar heat gain. Trinidad's continuous blades bring a streamlined appeal to both new and existing buildings.

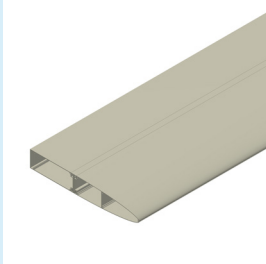

Its unique patented design incorporates three-part fins and an innovative engineered locking plate - the AC-300. This device is proven to increase durability and structural strength.

The system can be configured to compliment any sun shading design.
