

Care & Maintenance Guide

Caesarstone® Care & Maintenance Guide

Caesarstone® is a 93% quartz based product that has outstanding properties to ensure ease of maintenance and longevity of your surfaces. It will withstand exposure to tea, wine, vinegar, lemon juice and strongly coloured substances.

Everyday Cleaning

Caesarstone® requires very little maintenance to keep the surface looking like new. For everyday, routine cleaning of Caesarstone® we recommend wiping the surface with warm soapy water (a mild detergent) and a damp cloth or alternatively use a quality spray and wipe type cleaner.

Caesarstone® Cream Cleanser

Caesarstone® Cream Cleanser has been specially formulated to remove the most stubborn stains such as red wine or beetroot while taking care of your Caesarstone® surfaces. It is also suitable for cleaning sinks and taps, baths and basins, shower recesses, tile surfaces and cook tops.

Caesarstone® Cream Cleanser

Available to purchase directly from Caesarstone® offices in all states or online from www.caesarstone.com.au

Food Preparation

To avoid damage we always recommend cutting on an appropriate cutting board and never directly on the Caesarstone® surface.

Polishing

As Caesarstone® is virtually non-porous it will keep its lustrous gloss and ultra smooth surface without polishing and it never needs sealing.

Heat Resistance

Caesarstone® will tolerate brief exposures to moderately hot temperatures, however prolonged direct contact with, or radiated heat from very hot pots can cause thermal shock, discolouration or damage. Therefore we do not recommend placing hot pots, pans, electric frying pans, oven trays, etc. directly from the hotplate or out of the oven onto the surface of Caesarstone®. We always recommend the use of a hot pad or trivet to place hot items on.

Tough? Yes. Indestructible? No.

As with any surface, Caesarstone® can be permanently damaged by exposure to strong chemicals and solvents that undermine its physical properties. Do not use products that contain trichlorethane or methylene chloride, such as paint removers or stripper. Avoid any highly aggressive cleaning agents like oven cleaner that have high alkaline/pH levels. Should the surface be accidentally exposed to any of these damaging products, rinse immediately with water to neutralize the effect.

Warranty Registration

Have you registered your Caesarstone® 10 Year Limited Warranty yet? Do it online at www.caesarstone.com.au to receive a free Caesarstone® cleaning kit and a stainless steel Caesarstone® Authenticity Badge which demonstrates the authenticity of your Caesarstone® product.

Cordial	✓		
Spices	✓		
Food Oils			✓
Glue / Silicon / Paint		✓	

Extra stubborn dried spills and stains

For removal of these or if you wish to give your Caesarstone® surface a thorough clean then we recommend Caesarstone® brand Cream Cleanser and a 3M™ Scotchbrite™ Never Scratch™ All-Purpose Scrubber which can be used without damaging the stone, or alternatively applied to a soft damp cloth.

When using Caesarstone® Cream Cleanser we recommend using a small amount of the Cream Cleanser on a 3M™ Scotchbrite™ Never Scratch™ All-Purpose Scrubber which has been thoroughly soaked in warm water.

To remove adhered materials like food, gum and nail polish, first scraped away the excess with a sharp blade. If there are any grey metal marks on the surface, a mild detergent will remove it. Household bleach can generally be used as an effective cleaner to remove stubborn marks, but care should be taken as some products are considerably stronger than others.

For Motivo™ pattern textured collection it may also be necessary to use a non-abrasive soft bristle brush for extra stubborn stains.

Any Questions?

If you require any advice on caring for your Caesarstone® surface or technical enquiries please call us on **1300 119 119**.
