

Coil-coated aluminium double sheet aluminium panel Reynodual®

References

STANDARD: EFFECTS:

Metallic Sparkling,

Plain red, Matt anodised,

Black, white ... Chameleon ...

DESIGN Natural Design: DESIGN Wood Design:

Terracotta, Mahogany, Riyadh, Oak, Granite... Zebrano...

4 gloss levels: High gloss, satin, matt, MattXtrem

4 special coatings: Anti-Graffiti, StrongProtect, Anti-Bacterial and GreenShield

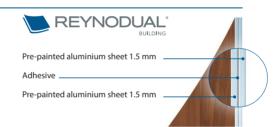

Main features

Reynodual* is a pre-painted double sheet aluminium panel for facades with high technical, visual and environmentally-friendly requirements. Consisting of two aluminium sheets bonded together Reynodual* ensures high wind resistance and meets the high fire resistance requirements of class A2 (EN 13501-1). It can be easily shaped and processed. The fully recyclable panel is available in great widths and all colours.

Applications

Reynodual is especially developed for outdoor applications on high-rise buildings and other buildings with high fire and wind resistance requirements. As a material for ventilated facades it meets the requirements of the RT 2012, especially with regard to thermal inertia, thermal bridges and thermal performance. It can be installed in cassette, screwed and riveted systems.

Manufacturer's particulars and installers qualifications

Cladding manufacturer should be qualified by Arconic Architectural Products. Reynodual aluminium double sheet panels should be installed by a fabricator/installer authorized by the principal manufacturer. The fabricator/installer shall have a minimum experience of 5 years in successful installation of composite cladding. The installation team should have sufficient experience in cladding installation. Contractor shall submit 10 years work guarantee from date of handing over.

Cleaning:

Frequent and regular cleaning once a year is strongly recommended or when the appearance has become unsightly or when deposits of atmospheric pollution or matter washed down from building surfaces are apparent. Regular cleaning of organic coatings will maintain the surface in a satisfactory state.

- Washing operations have to be carried out progressively from bottom to top. Wipe along the polishing direction, not across it. Rinse away cleaning chemicals with liberal amounts of tap water working from top to bottom. Wipe dry if possible.
- Cleaning agents depends on the site location and on the degree of contamination. Only water based mild
 cleaning agents should be used for cleaning organic coated flat products. The manufacturer advice should be
 sought in other cleaning agents especially solvents. Do not use chlorine containing cleaning agents such as
 bleach or strong acids (e. g. mortar removers).
- Harsh scrubbing or the use of abrasive or solvent cleaners, which will change the finish, should be avoided.
- Do not use wire wool or hand objects to remove stubborn stains.

Composition pre-painted double sheet aluminium	um panel Reynodual®	
Thickness		3 mm (-0.0/+0.3 mm)
Thickness pre-painted aluminium sheet		1.5 mm
Alloy & temper		Series 3000
Front side finish		Anti-corrosion treatment and DURAGLOSS* 5000 (35 μ m), PVDF 70/30* (25 μ m)** or polyester* (26 μ m)
Reverse side finish		Anti-corrosion treatment and a varnish protection
Characteristics pre-painted double sheet alumir	nium panel Reynodual*	
Width		1,000 mm / 1,250 mm / 1,500 mm (-0 / +3 mm) If 2,000 mm requested, contact us.
Length		2,000 mm up to 6,050 mm (< 4m: -0/+3 mm; > 4m: -0/+6 mm)
Weight		7.9 kg/m²
Tolerance in squareness		< 3 mm
Tolerance in bow		< 2 mm / 500 mm over lengths and widths
Performance pre-painted double sheet aluminiu	um panel Reynodual*	
Bond integrity	ASTM D1876	4.37 N/mm (mini) or 25 lbf/inch
Tensile strength R _m	NF EN 1396	140 – 185 MPa in 3003 H44
Yield strength R _{p0,2}	NF EN 1396	≥ 110 MPa in 3003 H44
Modulus of elasticity E		70,000 N / mm²
Stiffness (EI)		0,166 kN m ² /m
Thermal expansion		2.4 mm/m for a temperature variation of 100 °C
Sound attenuation	NF EN ISO 15 186-1	27 dB
		10051 0005
Temperature resistance		-40°C/+80°C
Maximum allowable deflection		-40°C/+80°C L/90
