

The DesignerVeneer range offers a decorative veneer board using timber in its most economical and environmentally sustainable form. All veneers are reconstructed from a range of timber species sourced from responsibly managed forests.

Applications

Ideal for use as doors, partitions and other vertical surfaces, the DesignerVeneer range is suitable for both residential and commercial applications.

E-Zero

DesignerVeneer uses an E0 MDF substrate. E0 is a low formaldehyde emitting product which has a formaldehyde emission of less than 0.5mg/L, which is lower than the current Australian standard LPM board.

Appearance

Like other dyed products such as fabric, it is possible that DesignerVeneer colours may vary slightly from batch to batch between 5-10%.

To ensure the best results, all veneer for a project should be ordered at the same time and the same coating and processing systems used, if required.

Download VeneerQuotes from Apple App Store or Google Play for instant veneer board quotes at your fingertips.

inspired
by the
colours of
Australia

DesignerVeneer is a specially selected colour palette of 13 reconstituted veneers drawing inspiration from the Australian outback.

Finishes

DesignerVeneer is available with a prefinished surface reducing onsite installation time, or with a natural timber surface for your preferred finishing product.

Sheet Size

Available as 3000 x 1200 x 19mm

UV resistance

DesignerVeneer is manufactured using superior dyes that are resistant to UV rays. Just as natural timber veneers will tend to change colour in the presence of light, DesignerVeneer may also be affected. This is part of a natural process and not a defect in the veneers. A UV coating is recommended to help minimise colour changes over time.

Edging

Matching edging is available for all colours in unglued rolls of 50LM x 22mm in unfinished raw veneer or ABS Prefinished Edging in Crossband and Longband for grain continuity.

Colours illustrated are indicative only and due to the printing process may vary in reality. Samples are available to order from the Gunnersen websites, your nearest branch or representative.
