# Made to measure, made to last!

## Superior Stainless Steel Lattice and Slatting

Superior Steel Lattice and Slatting is available in revolutionary BHP Stainless Steel. As tough and stylish as Superior Steel's Colorbond® Lattice and Slatting, it's also rust proof, making it ideal for harsh Australian conditions, and especially suitable for marine environments.

Stainless Steel Lattice and Slatting is available in a sleek, steel finish and will add a contemporary edge to any structure.

- **BHP Stainless Steel**
- **Rust proof**
- **Low maintenance**
- **No painting**
- **Termite proof**
- **Will not rot or burn**
- **Available a range of patterns, sizes and slat spacing**

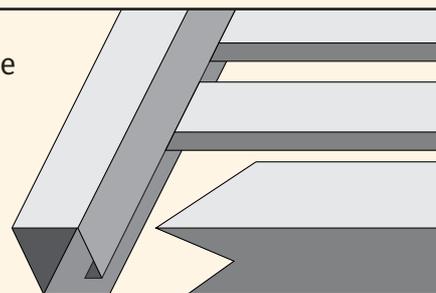

Superior Steel Lattice and Slatting is made from roll formed lattice strips, riveted together for strength and durability. It can be custom-made to any application and supplied either pre-fabricated or fully installed.

From manufacture to completion, Superior Steel Lattice and Slatting is protected by BHP's Plastic Corestrip – so your product is delivered and installed in perfect condition everytime.

To dramatically extend panel life, the lower corner of each border features a triangular drainage hole, allowing debris to be flushed out of the frame with periodic wash downs or rain – the product expects a 25 year life against corrosion.

**Right:** Components cut to size and ready to be assembled.

**Left:** Components correctly assembled before riveting.

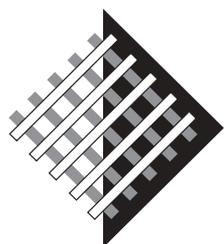

It's ideal for adding privacy and style to:

- **Spas**
- **Garden Screens**
- **Balustrade**
- **Building Awnings**
- **Carports**
- **Patios**
- **Pergolas**

For the latest in outdoor design, go with the product that lasts.

**Insist on revolutionary BHP Superior Stainless Steel Lattice and Slatting.**
