

Beautiful in form, reliable in function.

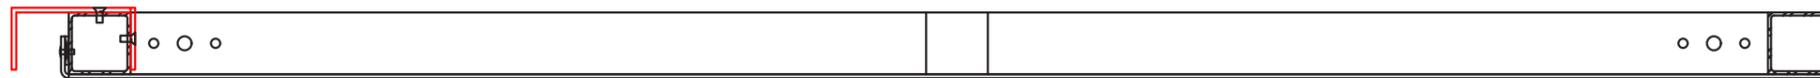

Decorative Screens

Screens can be installed with or without floor tracks and bottom floor guide rollers. Footbolts can be incorporated to lock panels in designated locations by use of flush finish ferrules.

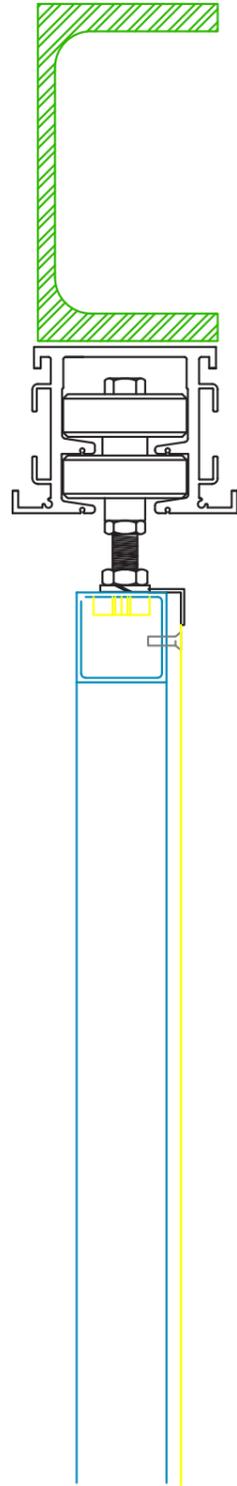

Full height pull handles can be incorporated for safe and easy movement of the screens

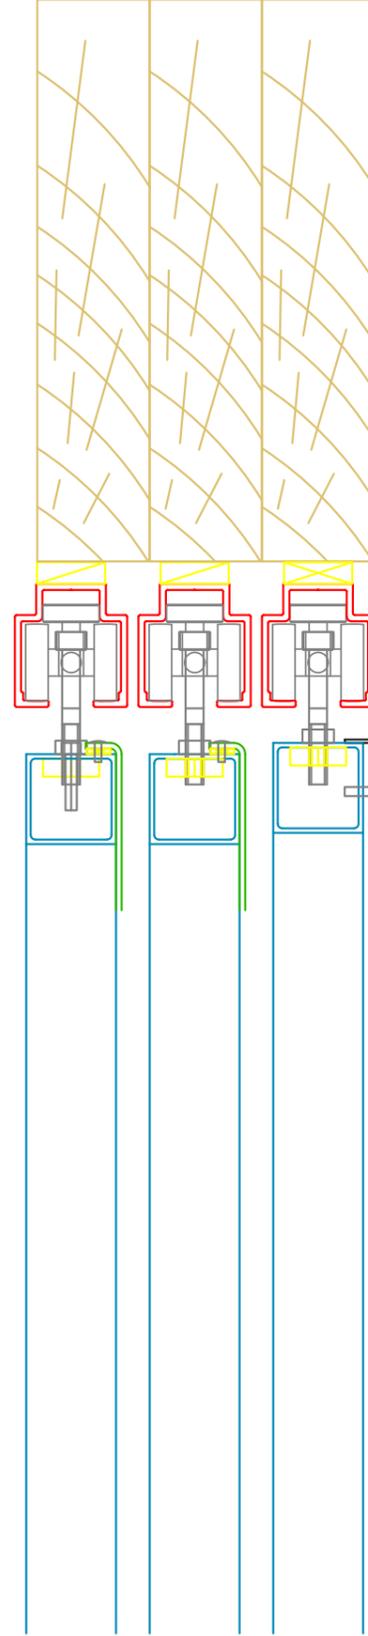

Beautiful in form, reliable in function.

Decorative Screens

Multi Direction Track And Rollers for screens that can turn and stack in various locations. Tracks and Panels can be installed to create grids for use in projects such as Art Galleries

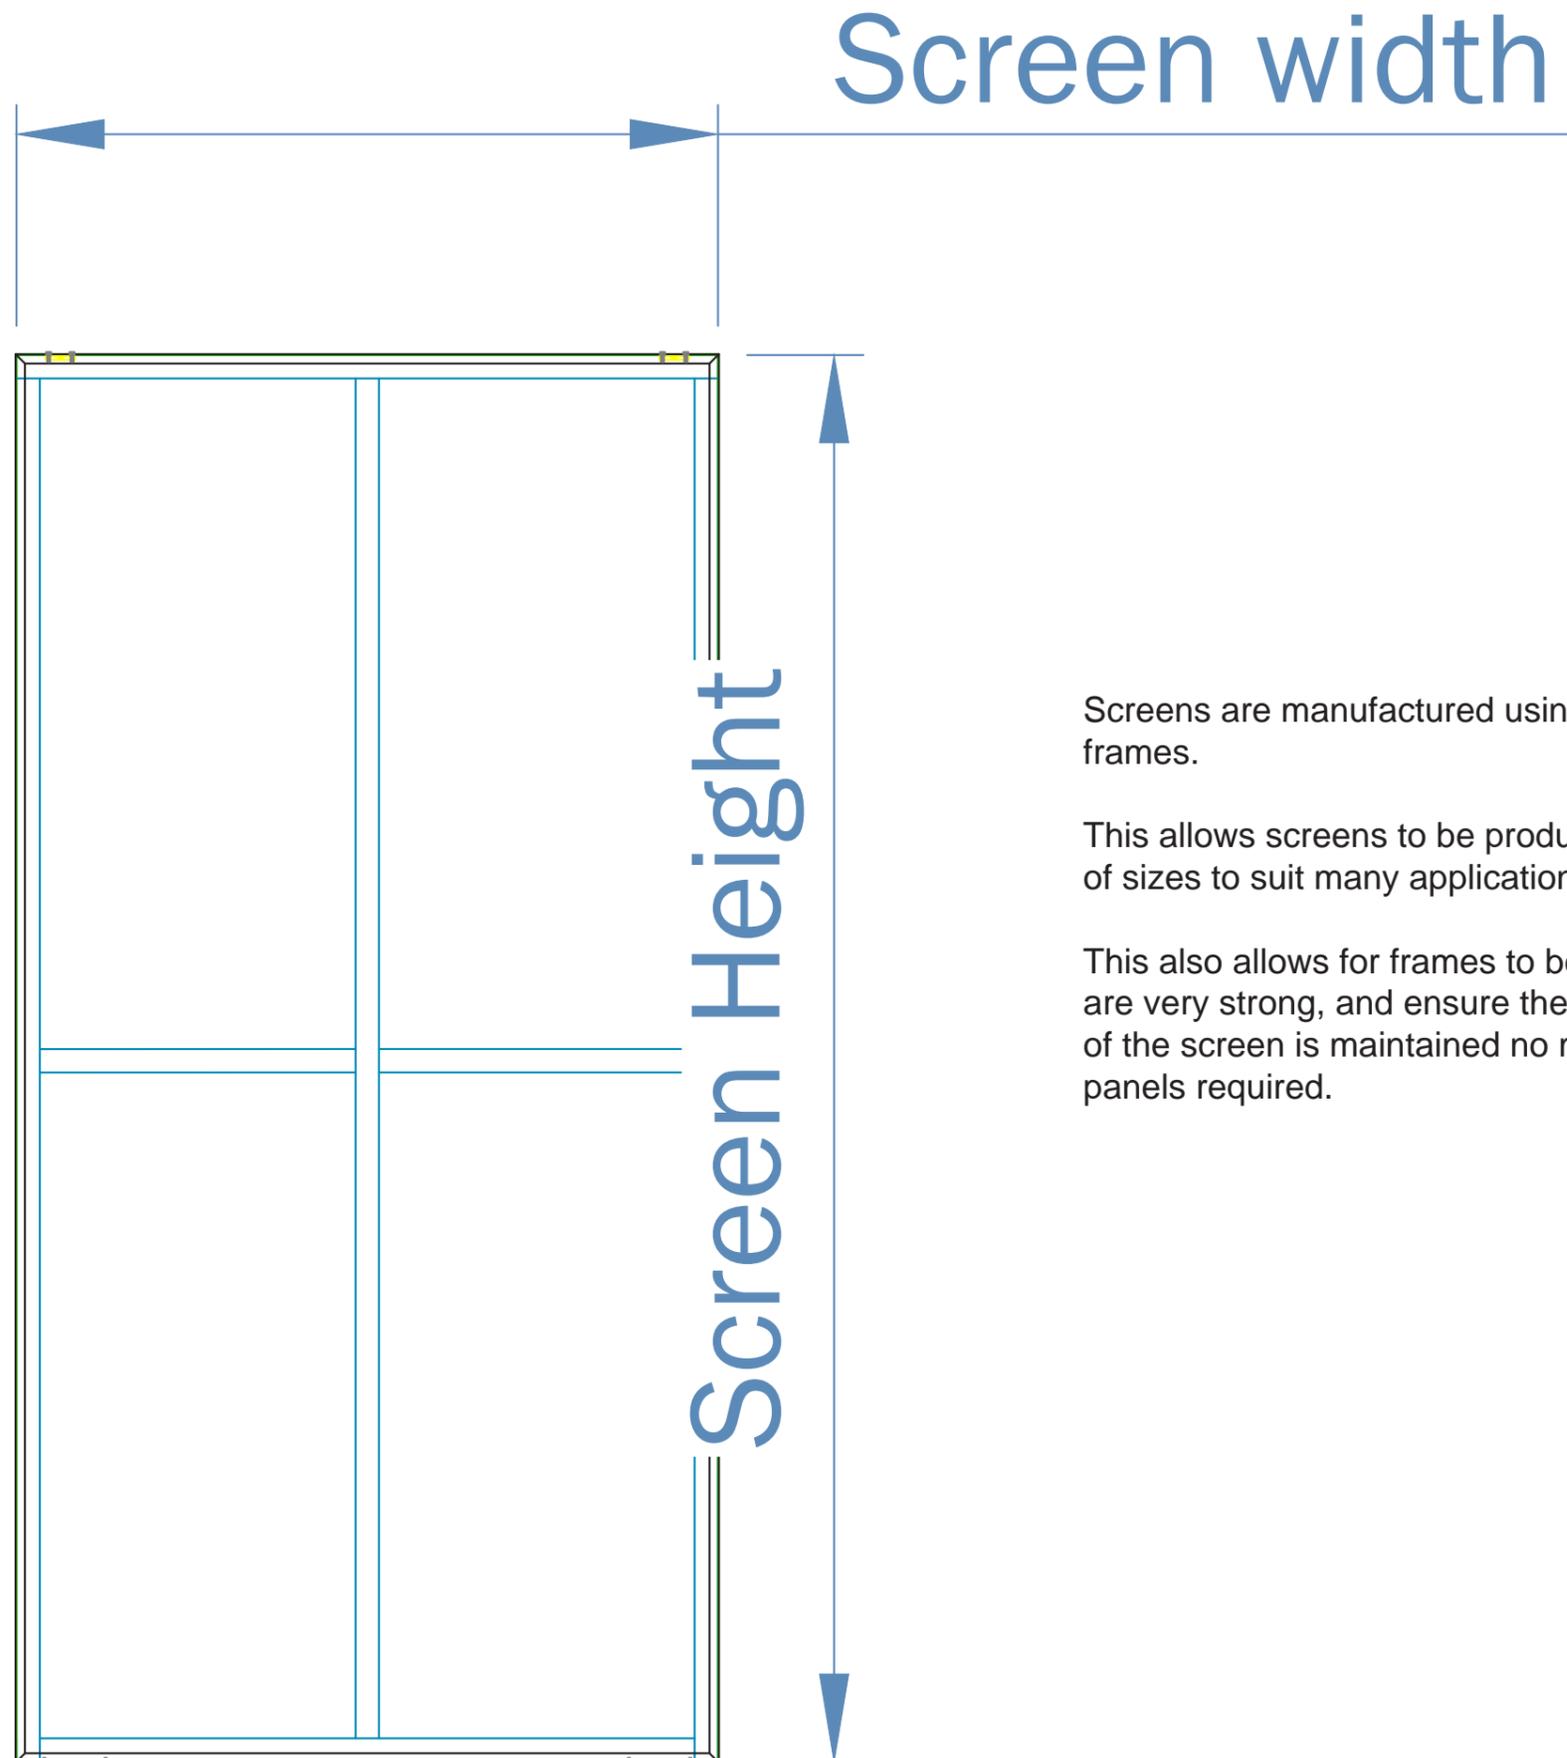

Perforated Sheets with powdercoat finish can be used for semi privacy screens

Linear track allow side by side track installation where screens move in two directions, independant of each other.

Magnetic Whitebards can be used for displays, or using panels in think tanks for collabrative brainstorming

Decorative Screens

Screens are manufactured using aluminium welded frames.

This allows screens to be produced in a huge range of sizes to suit many applications.

This also allows for frames to be produced that are very strong, and ensure the structural integrity of the screen is maintained no matter the size of panels required.
