ARCHCLAD™ ALUMINIUM NATUREL

Traditionally painted metal cladding has always been available as a single shade of colour. However this is soon to change thanks to the new range of PVDF Painted Aluminium Finishes from the **ARCHCLAD™ NATUREL** Collection.

The exciting new range of textures and colours recreate natural elements such as Titanium Zinc, Copper and Brass. Together with the advantages of an European Aluminium substrate, the range is accompanied by excellent warranties for long lasting, economic and creative results.

The Naturel collection is available in 0.7mm and 1mm thicknesses and can be roll-formed in any of the **ARCHCLAD™ PROFILES**.

Coating Layers
