

State Economic and Industry Prospects • 2013 – 2023

ECONOMICS

Long-term planning and strategy requires reliable forecasts relevant to your industry in your state. Unfortunately, medium and long-term state and industry-level forecasts are not typically readily available. That is about to change, with the release of BIS Shrapnel's series of *State Economic and Industry Prospects* reports.

Drawing on our specialist knowledge in key industries, BIS Shrapnel has nearly 50 years of experience producing quality forecasts and informative analysis at the state and industry level. Now, for the first time, this information is available in a series of accessible and affordable individual state reports.

The New South Wales *State Economic and Industry Prospects* report is available now. Reports for other states will be available over the coming months. Please contact us if you are interested in purchasing a report on another state, and we will prioritise those states that have the highest expressed demand.

The first state report will cost \$3,000 (including GST), with each subsequent state report purchased within that same 12 month period costing \$1,500 (including GST). Current subscribers to BIS Shrapnel's *Long Term Forecast* publication receive a 15 per cent discount on these prices.

COVERAGE

Each state report provides annual forecasts and accompanying narrative for the relevant state for the first five years and five-year averages for the next five years for the following variables:

- ▶ Gross State Product, State Final Demand and the various expenditure components
- ▶ Population, Employment and Unemployment
- ▶ Gross State Product, Gross Value Add and Employment by industry
- ▶ CPI, and WPI (wage price index) inflation
