

AM-BOSS FACTS

FACT:	FIRST	1979: AM-BOSS came onto the Australian market as the FIRST Australian-made attic access ladder.
FACT:	FIRST	1980's: AM-BOSS pioneered installations into Suspended Ceilings.
FACT:	FIRST	1996: AM-BOSS attic access ladders are physically tested and rated at 150kg at any given point – THIS IS NOT SPREAD WEIGHT! (<i>120kg Load Capacity is required by Australian Standards AS1657-1992 to obtain an "Industrial Strength" rating</i>).
FACT:	FIRST	1996: AM-BOSS attic access ladders are the FIRST and ONLY ones to offer a 20 Year Warranty on our aluminium Domestic Series range.
FACT:	FIRST	2003: AM-BOSS attic access ladders are the FIRST and ONLY ones to comply to the Building Code of Australia (BCA).
FACT:	FIRST	2008: September 2008 AM-BOSS has the "AM-BOSS Inferno-Boss™" tested for compliance to AS1530.4-2005. 2008: December 2008 AM-BOSS launches the FIRST 100% Australian Owned and Made Fire Rated pull-down attic access ladder that complies to AS1530.4-2005 with a -/90/90 rating.
FACT:	FIRST	2009: August 2009 AM-BOSS launches its new " Heavy Duty " series with an attic access ladder that tested and rated at a whopping 400kg at any given point – THIS IS NOT SPREAD WEIGHT! (<i>120kg Load Capacity is required by Australian Standards AS1657-1992 to obtain an "Industrial Strength" rating</i>).
FACT:	FIRST	2011: AM-BOSS attic access ladders again lead the industry by becoming the first company to have an attic access ladder that is CodeMark Certified. Obtaining a CodeMark Certificate of Conformity for a product or system is the only way to gain mandatory acceptance of the product or system compliance with the BCA.
