WEAR RESISTANCE
 10 Year Residential
 5 Year Commercial
 100% WATERPROOF
 ACCOUSTIC 30% less

AquaStep is produced with a high wear-resistant laminate layer and incorporates the advantages of the latest outdoor decking technology and traditional interior floors.

Aquastep is suitable for most all residential applications, particularly where the occurrence of flooding or moisture may occur. Unlike other timber flooring, you can use a mop and bucket.

AquaStep is suitable for under floor heating and will acclimate to the surrounding temperatures, leaving your floor warm and cosy during those winter months.
