STUDCO
BUILDING SYSTEMS

Clean. Lines No Architraves

The EZY Finishing System is a complete solution for achieving the ultimate 'clean line' interior finish for modern buildings. Flush-finish walls and ceilings are produced quick and easy with the EZY range of durable metal sections, including the patented EZYjamb door jamb.

Stunningly discrete, the EZY Finishing System is a perfect combination of versatile functionality and inconspicuous detail which creates a unique harmony in the square-set, architrave-free rooms it adorns.

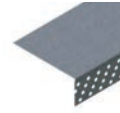

Designed and manufactured in Australia by Studco, the leaders in innovative building products.

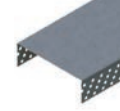

Benefits of the EZY-Finishing System

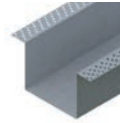

- **Modern styling**
 Achieve an award winning square-set finish
- **Fast construction**
 The fastest, most economical way to create that flush-finish look
- **Secure & durable**
 Manufactured from highest quality cold-formed metal sections
- **Complete system**
 Easy to create a consistent, contemporary theme throughout

Ezy-Pelmet

EZY pelmet

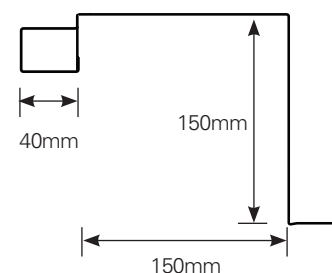

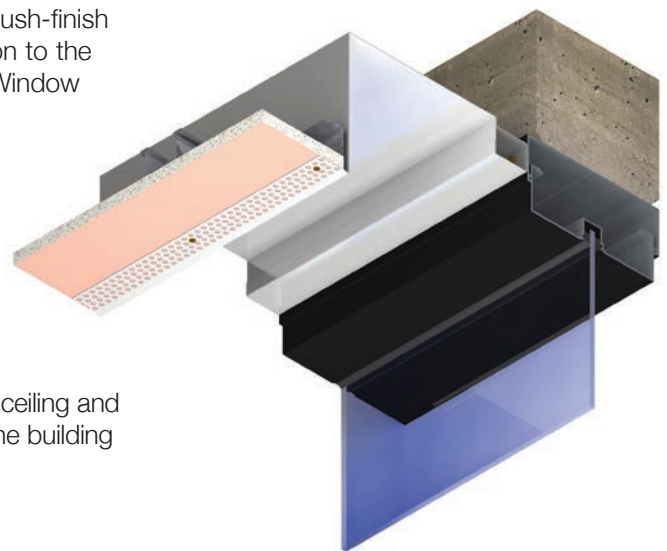

The newest addition to the EZY family of flush-finish products adds a completely new dimension to the internal perimeter of square-set interiors. Window blinds disappear, feature lighting is cleverly concealed and vast panoramas open up before your eyes with the all new Ezy-Pelmet® from Studco.

Ezy-Pelmet® is a two piece, pre-finished cold-rolled steel section which provides a fast, economical and prestigious solution for creating recessed window pelmets in plasterboard ceilings. It provides a simple and discrete transition between the interior ceiling and external windows, curtain wall facades or the building structure.

- Contemporary, clearview design
- Flush-finish edge for square-set interiors
- Completely concealed fixings
- Does not require fixing from the top
- Finished in white, no need to paint
- Install from below after ceiling
- Fastest method for creating window pelmets
- Suitable for blinds, curtain, lights & more

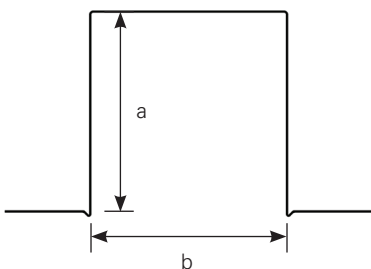

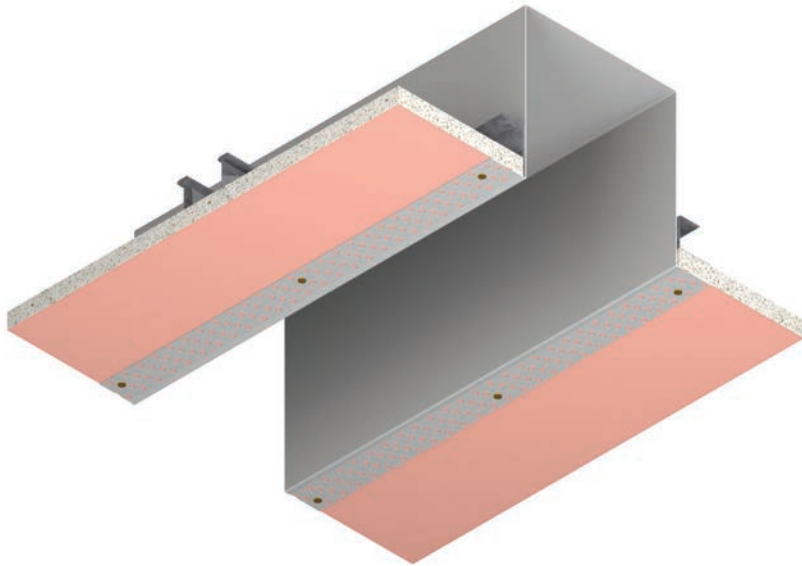

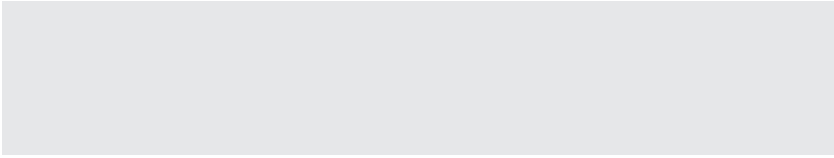

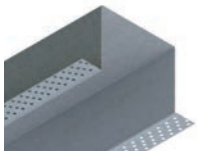

Ezy-Pelmet® is at home in apartments, offices, hospitals, schools, houses and just about any other application where a luxurious, clearview outlook is sought.

Custom Shadowline

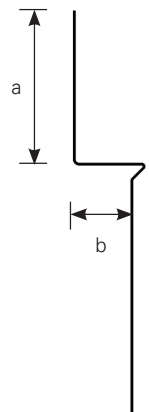

CUSTOM SHADOWLINE.....create versatile shadowline

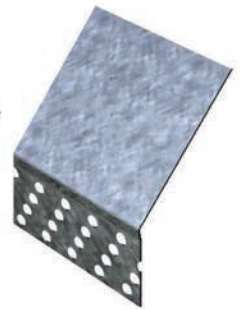

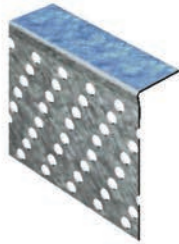

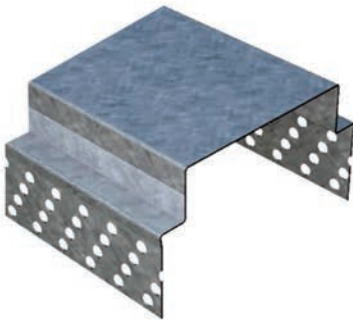

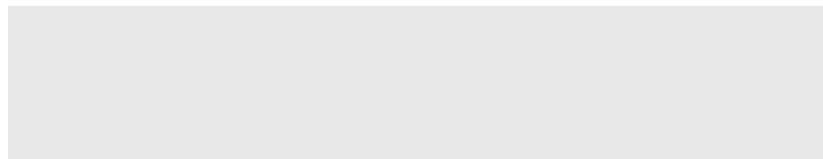

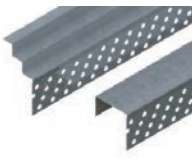

Architects and homeowners have been increasingly choosing interior designs characterised by clean, contemporary lines. The popular standard 10mm SL10 metal shadowline profile is used to provide that unique line around a perimeter of a ceiling, doorway or floor skirting. However the standard 10mm shadowline leaves little margin for error and the 10mm margin is often not enough. Custom shadowline from Studco provides an alternative to address these concerns.

- Create the exact shadowline you need
- Allow for variations in floor height or plaster thickness using a custom formed section
- Creativity and solutions to overcome issues using standard SL10 profile
- Heavy duty 0.8 zincaneal material to create a perfect straight and clean line

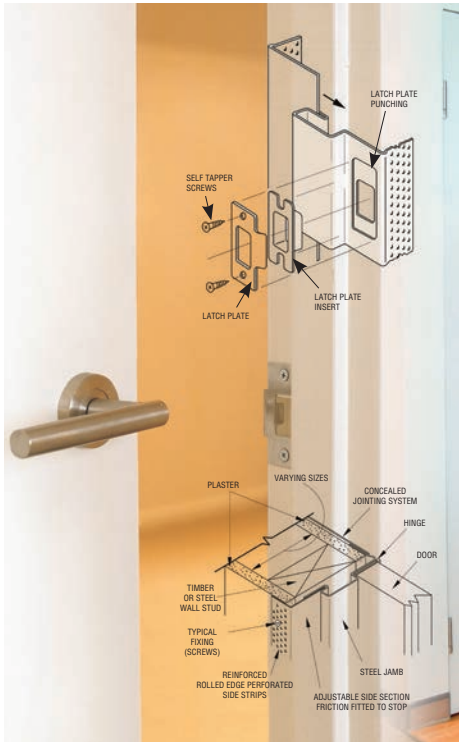

Custom Finishing Sections

CUSTOM FINISHING SECTIONS... ...create harmonious finishing sections

The clean line and square set look can now be achieved throughout your complete project. Contact the team at Studco to assist you with creating a custom flush finish section to suit your needs. Here at Studco we can provide a whole finishing package that will enable you to deliver the flush finish look. Call us today to see how we can assist.

EZY Jamb®

Ezy-Jamb...The Flush Finish Door Jamb System

For many years, architects, interior designers and developers have been trying to produce a contemporary flush finish door jamb with clean lines and inconspicuous detail.

Ezy-Jamb does just that!

Ezy-Jamb is a split-type jamb manufactured from cold rolled steel with a patented profile to produce a strong and secure assembly. The jamb comes with perforated sides for flush jointing giving the doorway a clean line look.

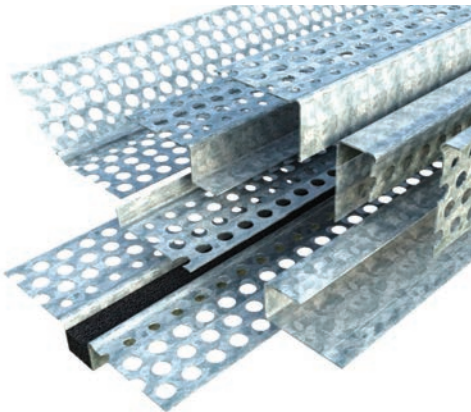

Ezy-Jamb is simple to install, and it requires no special maintenance. The jamb is a split-type and comes in two sections that fit neatly together and provides adjustability in wall thickness. The system is complemented by a range of hardware to suit different applications.
