# Alu Seleкта

## A new standard of durability

Urbanline Alu Seleкта is an innovative new product made from highly durable aluminium. This non-combustible cladding looks just like timber, and works interchangeably with Euro Seleкта profiles for a seamless look from top to bottom. Eco-friendly, low maintenance and incredibly durable, it's ideal for high rises and bushfire rated areas.

It's a new standard in aluminium cladding, offering new levels of style, new levels of choice and a truly realistic looking timber alternative. Each panel boasts a random computer generated pattern, ensuring no two panels look the same and a unique, natural appearance.

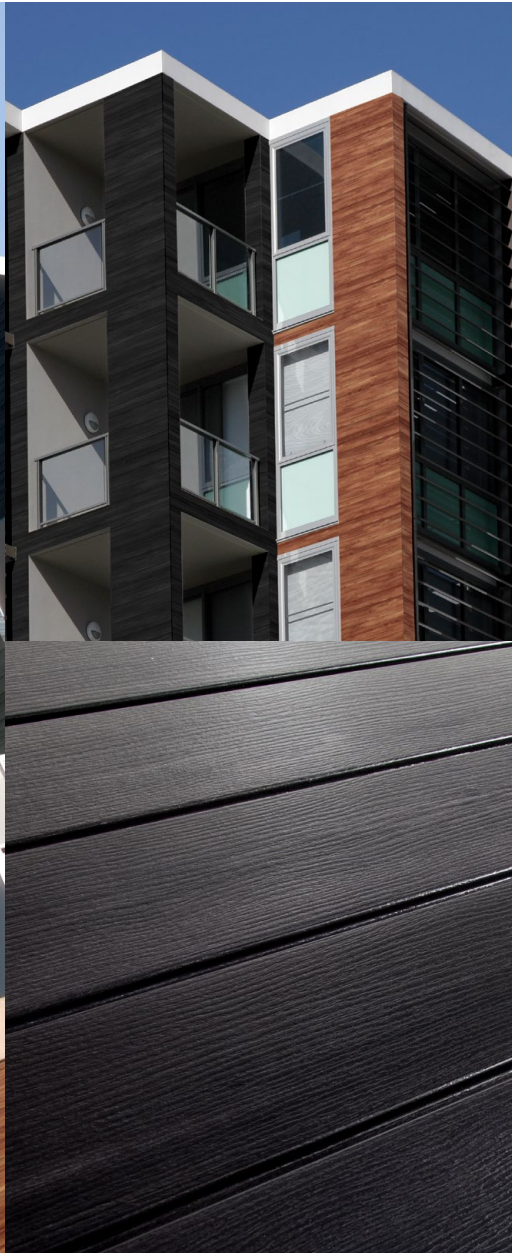

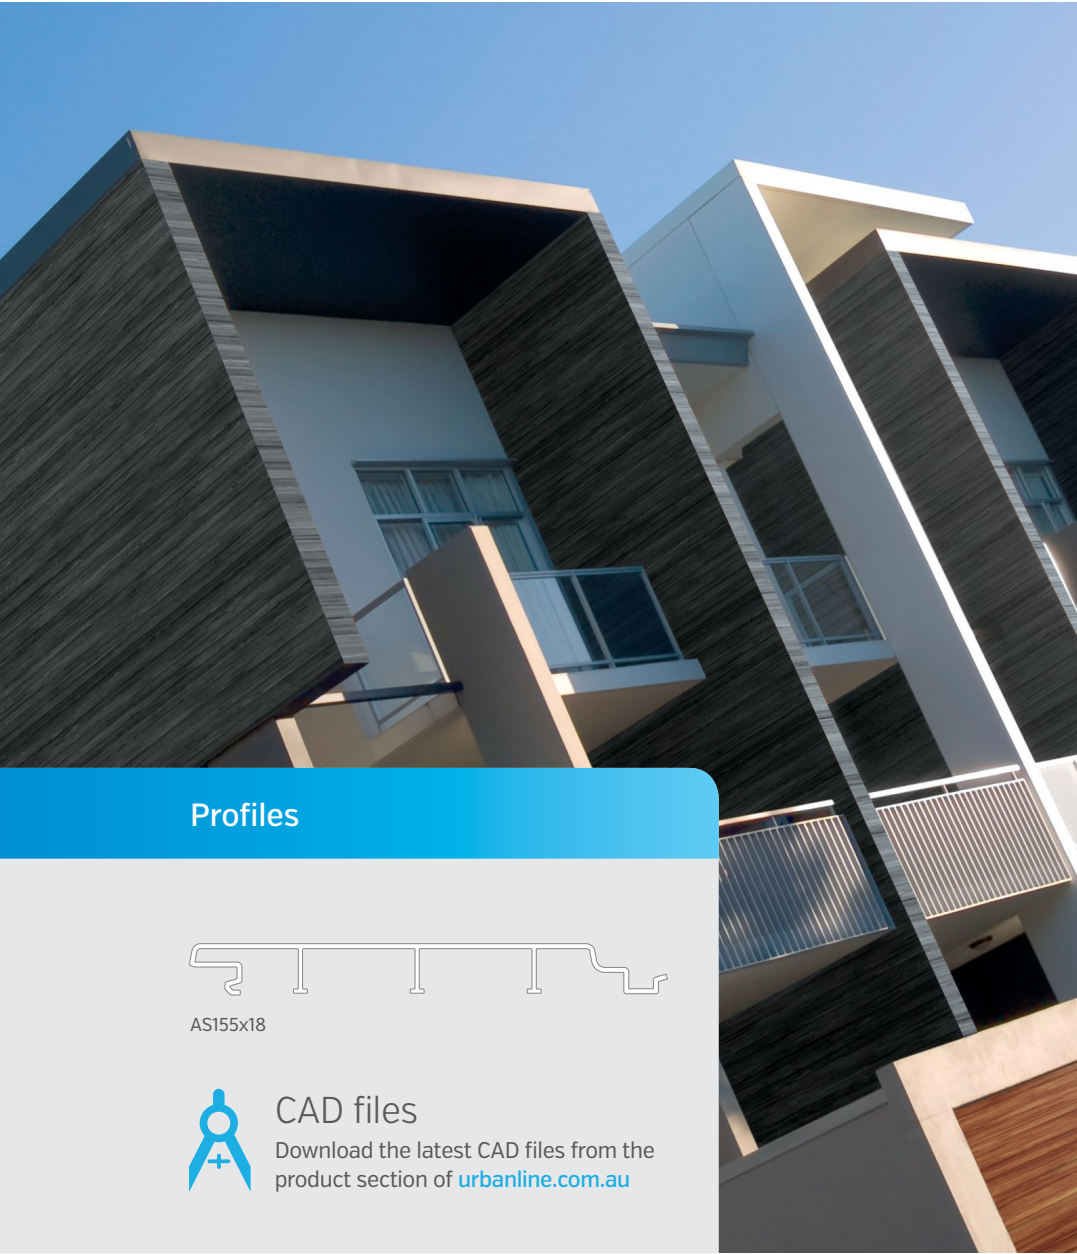

Match the three colours of Dark Cedar, African Ebony or Silver Oak to their Euro Seleкта counterpart for a seamless monochromatic style, or mix and match with the many other colour profiles available in Euro Seleкта to create eye-catching contrasts and patterns.

Alu Seleкта cladding is classed as a non combustibile product and is AS1530 compliant, meaning there's no restrictions for its use on any high rise building. Install it with confidence to high rise buildings or in bush fire prone areas and know the only maintenance you'll need is general cleaning.

Aluminium is an ideal choice for Australian climates - the reflective properties make it a natural energy efficient insulator, keeping buildings warm in winter and cool in summer. It's also incredibly hardy - resistant to insects, wind, hail, rain, and the coating

has passed a sea salt spray test as corrosive resistant.

Lightweight and easy to work with, Alu Seleкта is deceptively tough and will stand up to the hard knocks. Urbanline did not cut any corners, creating a robust 1.8mm thick profile body that is superior to alternative lightweight aluminium claddings on the market. The natural timber panel look comes without all the fuss of sheet panel installation. No need to machine panels off site, adding an expensive and time consuming process to your project. With Alu Seleкта you simply screw the lengths into place.

## High rise cladding

Alu Seleka gives the genuine and unique look of timber, with the toughness of aluminium. A smart timber alternative for high rise buildings that need a non combustible material. Use it for:

- High rise buildings
- Refurbishing commercial buildings
- Large scale commercial facades
- Bushfire prone areas
- External feature facade cladding for domestic and commercial applications
- Feature cladding for soffits
- High-exposure, difficult to access areas
- Low-maintenance substitute for timber feature cladding
- Feature facade cladding for multi-storey apartment buildings, where maintenance is difficult
- Gable ends

## There are so many great reasons to choose Alu Selekt

### Sizing

155mm cover x 18mm thick x 1.8mm body thickness x 5.480mm in length.

### Non combustible

Complies with the NCC and Australian Standard AS1530 - no restrictions on any high rise building.

### Interchangeable with Euro Selekt

Use Alu Selekt for non-combustibility high rise applications and Euro Selekt in more accessible areas including soffits.

### Installer friendly

Pre-finished profiles and simple fixing system makes for quick and easy installation.

### Ideal timber substitute

Perfect for use in high-exposure or difficult-to-access areas.

### Rot and pest resistant

Guaranteed not to crack, split, bend, warp or break if used and installed correctly.

### Comprehensive 10 Year Warranty

Guaranteed quality and peace of mind. Visit [urbanline.com.au](http://urbanline.com.au) for more information

### Accessories available

Range of smart aluminium trims and accessories available. Ask our helpful staff for more information.

### Realistic

Timber grain replica is not blurry or distorted. Sharp pattern is computer generated so no two boards are the same.

### Low maintenance

Only general cleaning required - a straight forward process for an intelligent designed profile.

### Sustainable

Alu Selekt is made from aluminium therefore 100% recyclable product.
