

Aluminum Extrusion Strip Lighting

- for direct and indirect lighting of commercial and residential spaces

1300 771 516

boscolighting.com.au

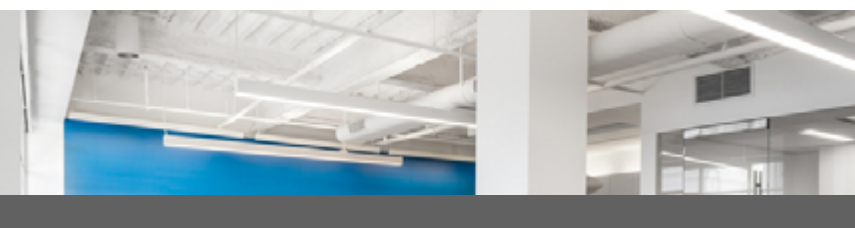

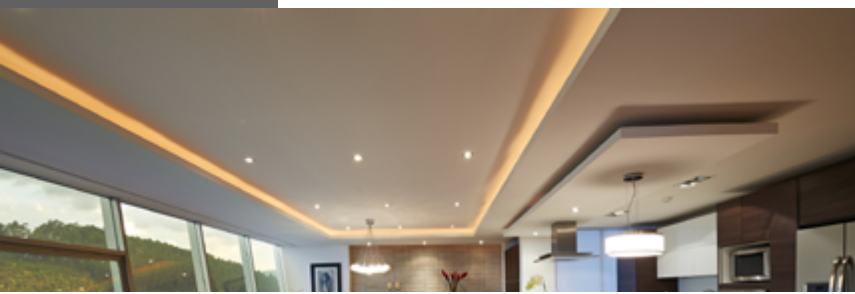

- Over 70 type of extrusions including flush, surface mounted and suspension options
- Easy to cut to size or extend as needed
- Good heatsinking for LED longevity
- Effective for direct and indirect lighting

BoscoLighting's Extrusions

BoscoLighting's range of aluminium extrusions has been enhanced to allow more choices with indirect lighting as well as task and decorative lighting. This gives architects and designers more flexibility and more ways to realise their vision for their projects. BoscoLighting now offers more than 70 types of aluminium extrusions and multiple options for each, enhancing design flexibility in any lighting project.

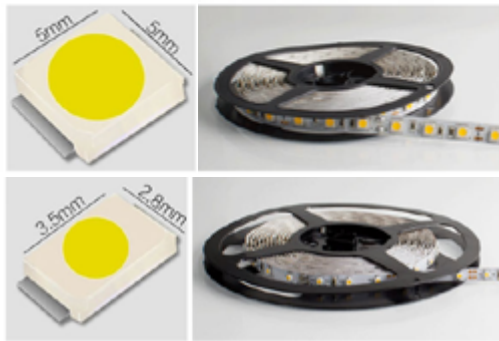

Comprising suspended up/down lighting extrusions, waterproof extrusions, suspended tubular extrusions, recessed flanged extrusions and surface mounted arched extrusions among many more, BoscoLighting's aluminium extrusion range is easy to install and can be supplied cut-to-length.

The new aluminium extrusions take lighting design to the next level with options for lights to be recessed into walls, ceilings and even in-floor. Suspended fittings can also be mounted at varying heights to create amazing 3D effects for reception areas, breakout rooms or meeting spaces. Aluminium extrusions are also effective for indirect lighting of walls and ceilings, creating natural lighting effects that lead to enhanced productivity of workers and students as well.

1300 771 516

boscolighting.com.au

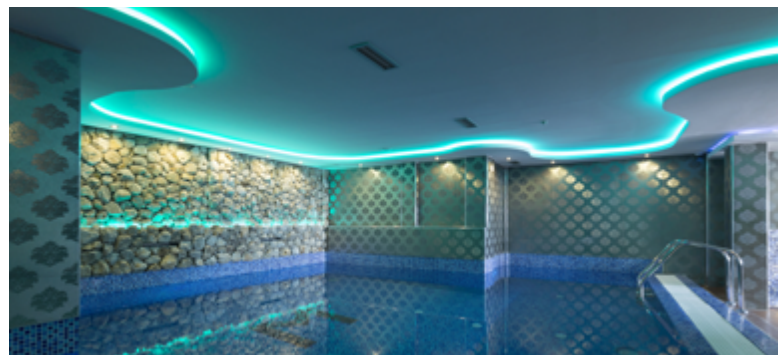

- Choice of Warm, Neutral or Cool White's as well as single colours and colour changing RGB
- Easy to cut to size or extend as needed
- 35,000-hour lifetime with a 3-year warranty (L90 B10)
- Highly versatile light available in flexible or rigid form
- Sealed silicone casing for water resistance and easy cleaning (Waterproof)

BoscoLighting's Strip Lights

One of the most dynamic and versatile light sources available, strip lighting can be used almost anywhere. Available in various lengths, colours, brightnesses as well as IP ratings, strip lights are used in places as variable as bathrooms, kitchens, paths, and even inside aeroplanes.

Strip lights are a great way to supply an even light along a length such as under kitchen benches, along the wall of a garage or a corridor.

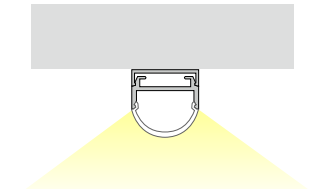

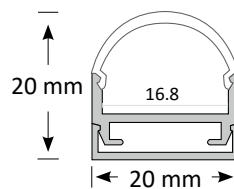

Surface Mounted Extrusion

Surface Mounted Extrusion is perfect for situations where recessing lights are not an option. This light can help and set the mood of each room in homes, offices and retail stores, creating a particular modern flare. The high quality aluminium extrusion can be cut to length as required.

The extrusion is designed to house BoscoLighting strip lights or modules. It helps dissipate heat for maintaining LED performance while also protecting the lights.

Corner Extrusion

Corner extrusions are designed for the joints between walls, cabinets or ceilings and allows an elegant and minimalist lighting solution. Lightweight, it is easy to install with bonding-resin usually being sufficient.

The extrusion requires additional BoscoLighting strip lightings or modules which should be ordered together to ensure compatibility. Our extrusions are designed to dissipate heat which is essential for maintaining LED performance and lifetime.
