

Broadmoor Hospital Project

Berkshire, England

Project Description:

Wallgate has a long history of working closely with West London Mental Health NHS Trust (WLMHT) and supplying products to Broadmoor Hospital – the current new build project is no exception.

Working closely with Kier Major Projects, architects Gilling Dodd and WLMHT we have developed sanitaryware and electronic control to meet the specific requirements of this high secure facility; which includes a new range of high security mirrors, temperature adjustable patient showers and a high level of electronic water management to give staff full and safe control over the services within the secure washrooms while maintaining a normalising or non-institutional environment.

Work on Broadmoor Hospital includes 234 high secure mental health bedrooms with phase 1 being ready to accept patients in 2017.

Charles Drew, Secure Sales Manager said “Broadmoor Hospital is one of the biggest developments in the high secure mental healthcare market in the UK and it is a privilege to be involved in such a prestigious project. The Wallgate products involved were developed to enhance safety and security whilst normalising the environment and it is a delight to see them incorporated on this project.”
