

...KEEPING THE WORLD ON ITS FEET

Grip Guard, the most trusted non-slip floor treatment dedicated to 'keeping the world on its feet'

The directors of Grip Guard have been dedicated to providing unique, effective and innovative floor safety solutions since 1997. As a company dedicated to the prevention of accidents in the workplace and in our homes, Grip Guard's interest lies in improving the safety and quality of life for everyone.

Grip Guard Anti-Slip Floor Safety Treatment, our flagship product/service, has been responsible for reducing the risk of slip and fall accidents for thousands of people – every day! A unique and remarkable safety process, Grip Guard anti-slip treatment can make floors safer to walk on WET than dry!

A recent focus on tactile guidance systems has allowed Grip Guard to provide floor safety solutions that aid the visually impaired in their efforts to safely navigate areas outside their familiar surroundings – something most of us take for granted. These efforts have allowed access by the visually impaired to areas that previously might not have been possible.

With increased emphasis on workplace and public safety over the past ten years, Grip Guard has grown to be one of the world's largest floor safety providers with a comprehensive range of products and services. The Grip Guard network provides personalised advice, products and services to thousands of businesses, households and government departments throughout the world.

Grip Guard products and services include:

- Grip Guard Anti-Slip Floor Safety Treatment
- Safety Clean / Floor Safety Management Programs
- Anti-Slip Tapes - Indoor / Outdoor
- Safety Stair Nosings
- Marine Grade Safety Flooring
- Safety Matting including: Entrance Matting, and Anti-Fatigue Matting
- Tactile Guidance Systems.

Grip Guard can make floors safer WET than dry

Grip Guard Anti-Slip Floor Safety Treatment microscopically modifies the floor surface. This modification dramatically increases the grip for bare feet, shoes, and all kinds of pneumatic and solid wheel tyres.

Grip Guard causes no visible change to floor surfaces

Grip Guard treatment is invisible to the naked eye yet *dramatically* increases the slip resistance of the floor creating a safe floor surface for pedestrians and vehicles. The treatment permanently modifies the floor surface – it is not a coating and therefore will not wear off.

Grip Guard operators test all floor surfaces to measure their slip resistance

Grip Guard operators measure the coefficient of friction (COF) of all floor surfaces prior to and after treatment to ensure that all safety standards are met. An ASM slip meter measures the slip resistance and results are documented and included on our warranty.

Grip Guard treatments won't disrupt normal business practices

Grip Guard treatment can usually be carried out during business hours with little or no disruption to normal business procedures. Work can also be arranged outside of business hours. The floor surface is safe to walk on immediately after treatment is completed.

Grip Guard requires no special maintenance

Unlike surface coating and mats which require regular maintenance and can quickly look unsightly, Grip Guard requires no special maintenance. Treated floors can be cleaned as per normal.

Grip Guard operators are fully trained floor safety experts

Grip Guard operators undergo comprehensive floor safety training programs and are qualified to provide experienced floor safety advice and treatments.

Grip Guard Warranty of Slip Resistance

Grip Guard provides clients with a warranty that documents the slip resistance of the floor surface both prior to and following Grip Guard treatment. The warranty also specifies the area/s treated as well as methods undertaken. The Grip Guard warranty enables property owners to document that floor safety issues have been addressed.

Grip Guard Anti-Slip Tapes

Grip Guard supplies and installs an extensive range of anti-slip tapes suitable for both indoor and outdoor application. Grip Guard tapes are available in a wide range of colours including transparent and glow in the dark. The tapes are very durable and have excellent adhesion for long-term performance. The Grip Guard range of tapes includes:

UltraGrip – Abrasive non-slip tape designed to provide an exceptional slip resistance for many surfaces. Available in a large range of colours including standard black, safety yellow, photo-luminescent, hazard stripe, and more.

AquaGrip – Non-abrasive non-slip tape designed to provide an anti-slip finish without being abrasive. The tapes are ideal for wet areas such as swimming pool areas and boats as they will not damage skin, clothing or wet suits. AquaGrip is also suitable for food preparation areas because, unlike traditional tapes, its unique profile does not trap contaminants. Transparent AquaGrip is ideal for feature timber stairs to provide added slip resistance without intruding on the aesthetic of the timber.

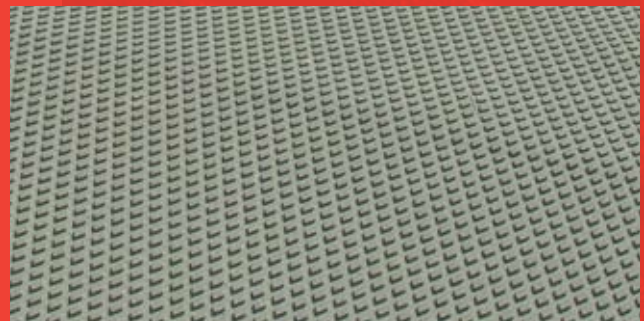

ConformaGrip – is the ideal solution for irregular surfaces such as checker or durbar plate. With a unique aluminum backing, ConformaGrip moulds to the profile of the surface to ensure maximum adhesion and durability.

COLOUR RANGE

Marine Grade Safety Flooring

Grip Guard marine grade safety flooring is designed to provide a secure non-slip surface in areas where grip under foot is essential for pedestrian safety. The diamond shaped nodule design channels water away reducing any dangerous pooling, a major cause of aquaplaning. Grip Guard marine grade safety flooring is a cost effective means of eliminating the risk of slips and falls, particularly on ramps and in marine environments.

COLOUR RANGE

Grip Guard Stair Safety

Grip Guard stair safety solutions are suitable for residential, commercial, and industrial applications. To ensure pedestrian safety, stair nosings must have adequate slip resistance as well as a luminance contrast to the substrate on which it is installed. Our extensive range of stair safety solutions include:

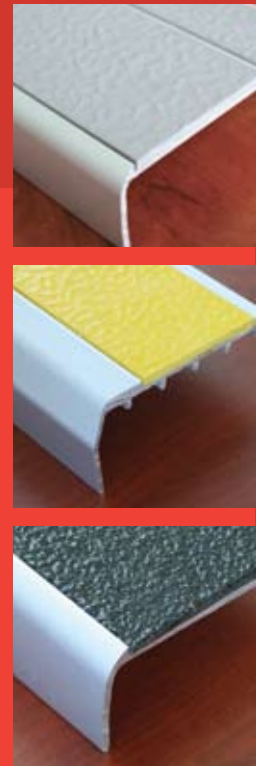

Integrated Safety Nosings

Grip Guard ProStep® heavy duty integrated safety nosings are manufactured from reinforced aluminium extrusion and anodised to provide building owners with a long term, attractive, non-slip safety solution.

Grip Guard ProStep® nosings are designed to provide optimum slip resistance and luminance contrast on the leading edge of stairs and protect the stair edge to enhance the service life of the stairs.

COLOUR RANGE AND STYLES

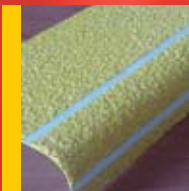

Carborundum Modified Safety Stair Nosings

Suitable for a wide range of commercial and industrial applications, carborundum modified safety stair nosings are a cost effective stair safety application. This simple, yet highly effective anti-slip solution can be purpose built for any application.

- R13 rating for optimum safety
- Available in galvanized steel, stainless steel or color bond
- Multitude of sizes and profiles available.

Grip Guard stair nosings are designed to meet all aspects of the Australian and New Zealand Standards AS/NZS 1428 part 4. Complies with all aspects of the Building Code of Australia.

Grip Guard Photo Luminescent Stair Nosings.

To achieve maximum safety for stairs, Grip Guard's range of 'glow in the dark' stair nosings ensure clear visual identification of step edges when natural or artificial lighting is lost.

VICROADS APPROVED

Permanent – Inlaid Tactile

Grip Guard CobbleTac® Tactiles provide safe and effective tactile cues for the vision impaired. They are manufactured using tough porcelain to provide a cost competitive permanent solution and are warranted against manufacturing faults for a period of 10 years when installed to the manufacturer's installation instructions.

COLOUR RANGE

Discrete architectural stainless steel Tactile indicators

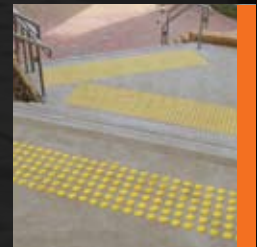

Grip Guard SureSteel®, discrete architectural stainless steel Tactile indicators are designed for installation in aesthetically sensitive applications or where exotic substrates are used such as polished timber, marble, granite, and the like. SureSteel® is manufactured from one solid piece of 316 stainless steel so the Tactile head will never detach from the anchoring spigot.

Discrete architectural plastic Tactile indicators

Grip Guard PolyStud®, discrete architectural plastic Tactile indicators are designed for installation in aesthetically sensitive applications or where exotic substrates are used such as polished timber, marble, granite, and the like. PolyStud® is engineered and purpose built tough to withstand extreme point loading and side impact.

The unique formulation and large anchoring spigot not only ensure the product is made to last, it also protects the substrate from any possibility of damage. PolyStud® is long lasting & resistant to heavy traffic abuse and maintenance machinery.

COLOUR RANGE

Retrofit – Polymeric Tactile

New, unique 600x900mm format makes Grip Guard PolyPad® Tactile seamless. They are designed to retro-fit over almost any substrate and provide installers and building owners with the most simple and effective installation system. Less joints also ensures less dirt ingress and reduces the possibility of failure. Also available 300 x 300 peel and stick suitable for internal application onto vinyl, timber and other smooth surfaces.

COLOUR RANGE

SafetyClean – Custom Floor Safety Maintenance Program

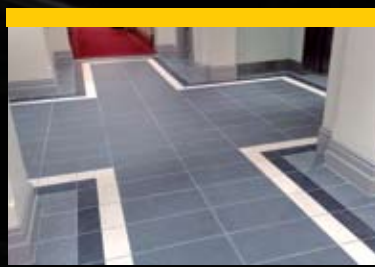

Floor cleaning is an integral part of the overall floor safety equation. Day-to-day cleaning can usually achieve a clean looking floor; however as a lot of contaminants can be absorbed into the floor – in particular into grouting – basic cleaning methods can fail to ensure the floor is as safe as it can be.

When a floor becomes wet, or is walked on with wet feet, dirt and other contaminants in the floor can be reactivated onto the surface. Often this can be a buildup of detergent residue or grease which mopping alone hasn't removed.

Periodical 'deep-cleaning' of the floor will help ensure any buildup of contaminants is kept to a minimum.

Grip Guard provides custom 'deep-cleaning' programs for clients who want to give their floors the best chance to deliver the safest conditions underfoot.

Grip Guard's SafetyClean is ideal for commercial kitchens, foyers, outdoor paths, bathrooms and shower facilities etc. where contaminant buildup is usually unavoidable. Utilising the very best floor cleaning solutions and methods, the results are outstanding.

Grip Guard Residential Safety Services

How safe is your home?

We are constantly reminded about workplace safety, yet most accidents occur in the home. Some form of insurance generally covers accidents at work, yet we spend a great deal of time at home exposed to uninsured hazards.

Grip Guard offers the same floor safety services to the domestic market as provided to the commercial market. Floor tiling to bathrooms, laundries, kitchens, outdoor dining areas etc can be treated to help reduce the risk of slip/fall accidents. Stair safety improvements can help avoid serious injury risk on internal and external steps.

Grip Guard Residential Safety Services provide you with effective and economical safety improvements to ensure you, your family, and visitors are 'as safe as houses'!
